Power

High Side Driver

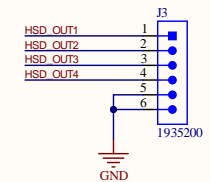

Rsense Calculation (R6, R9, R11, R13)

MCU ADC Range: Max 3.3V
 Max Testing Current: 5A
 Typical Current Sense Gain Value: 465

$R_{sense} = 465 * 3.3V / 5A \approx 307 \text{ Ohm}$
 Select 220 Ohm to be safe and to use 0603 footprint

Screw Terminal to Load Tester
