

Power

Header to Nucleo

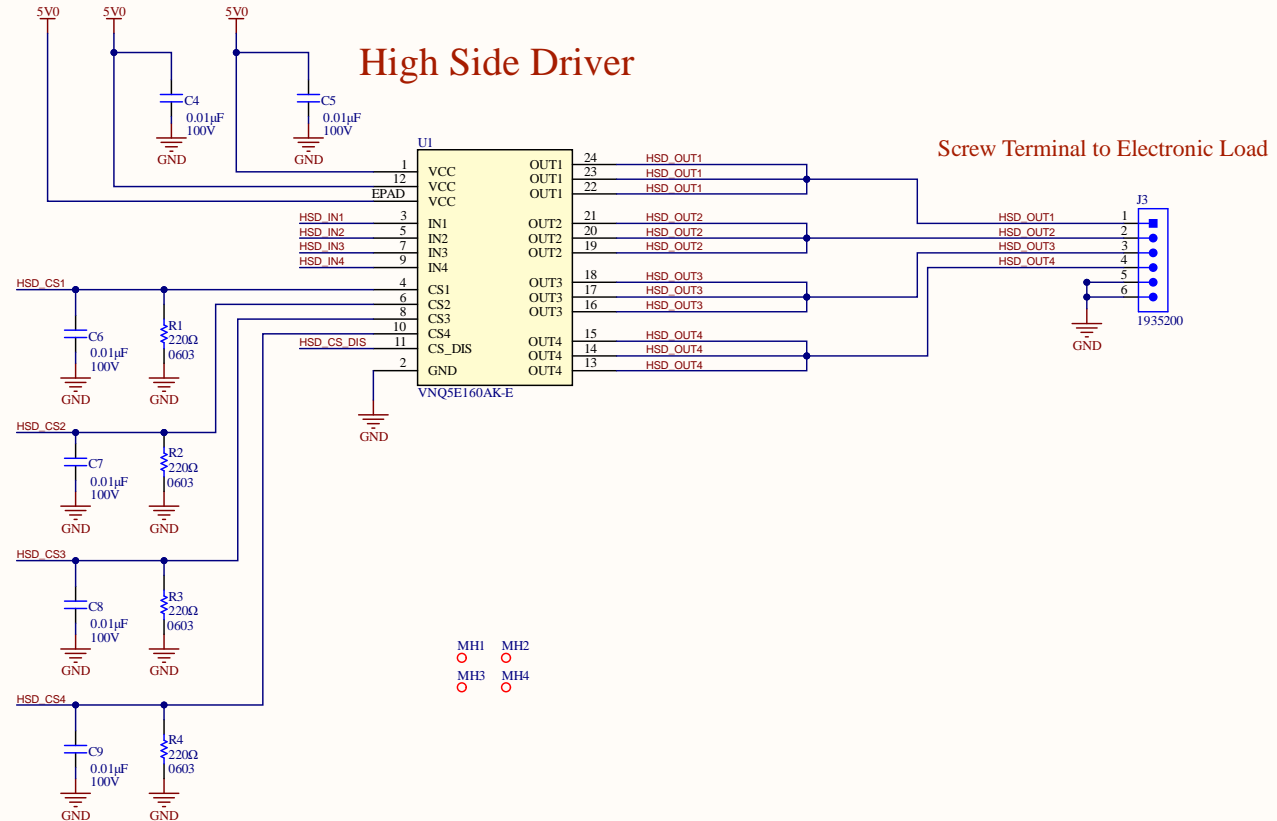

A Rsense Calculation (R1, R2, R3, R4)

MCU ADC Range: Max 3.3V
 Max Testing Current: 5A
 Typical Current Sense Gain Value: 465

$R_{sense} = 465 * 3.3V / 5A = 307 \text{ Ohm}$
 Select 220 Ohm to be safe and to use 0603 footprint
